## AGENDA SUPPLEMENT

Dear Sir/Madam

### PLANNING COMMITTEE - MONDAY 25 JULY 2016

I refer to the agenda for the above-mentioned meeting and enclose the following additional item:

Item No	Report Title	Page Nos
13.	<b><u>2016 Annual Statement of Five Year Housing Land Supply</u></b> Report of the Executive Director of Commercialisation.	204 - 235

Yours faithfully

*Helen McAleer*

Senior Democratic Services Officer

**BRECKLAND DISTRICT COUNCIL**

**Report of:** The Executive Director for Commercialisation

**To:** Planning Committee 25.07.16

**Author:** Steve Ottewell – Operations Director: Capita

**Subject:** 2016 Annual Statement of Five Year Housing Land Supply

**Purpose:** The purpose of this report is to inform the Planning Committee of Breckland’s current situation in regards to a five year housing land supply

**Recommendation(s):**

- 1) That the Planning Committee notes the contents of this report for their information and any implications for decision on relevant Planning Applications.

**1.0 BACKGROUND**

- 1.1 It is a requirement of the National Planning Policy Framework (NPPF) to prepare a five year housing land supply statement on an annual basis. The full assessment for 2016 is included at Appendix A of this report.
- 1.2 The 5 Year Housing Land Supply is a comparison of the anticipated supply of new dwellings, against the number of new dwellings that are required to be built in Breckland (known as the housing requirement). It is expressed as the number of years’ worth of supply available. The 5 year period is a ‘forward look’ produced on at least an annual basis and standard practice is for the starting point to be 1 April each year.
- 1.3 The 5 Year Housing Land Supply Statement is a means of demonstrating that the Council is meeting the housing development needs of the district and is a key plank of the National Planning Policy Framework (NPPF) to ‘*boost significantly the supply of housing*’ (para47). Further guidance on land availability and 5 year supply is provided in the national Planning Practice Guidance (PPG). Both the NPPF and PPG are available to view at <http://planningguidance.planningportal.gov.uk/>.
- 1.4 The first part of the calculation is to establish the housing requirement. The requirement figure is usually the adopted target in the district’s Local Plan. However, the Breckland Core Strategy was adopted prior to the NPPF and the targets were created in the context of the former Regional Spatial Strategy. As such the emerging Objectively Assessed Need (OAN) targets from the new Strategic Housing Market Assessment may present a more robust up-to-date position. The 5 Year Land Supply Statement presents two calculations using either approach.
- 1.5 The NPPF states that the housing requirement must include a 5% or 20% buffer (moved forward from later in the plan period) to ensure choice and competition in the market, and the PPG requires that any un-delivered units from previous years must be allowed for in future years. The PPG recommends that this should be done within the next 5 years, but does not require this.
- 1.6 The Breckland calculation incorporates a 20% buffer, and makes allowance for un-delivered units. Two separate calculations are shown using the two different approaches to

making up the “shortfall” in undelivered units. The “Sedgefield” approach, recommended by the PPG, where the shortfall is made up in the next five years, and the “Liverpool” approach, where undelivered units are made up over the remainder of the Plan period.

1.7 The housing supply is made up of deliverable sites which are in suitable locations, available now and achievable in the next five years. The housing land supply is made up of the following components:

- Sites with planning permission: large and small sites with planning permission are considered deliverable until permission expires or unless there is clear evidence that schemes will not be implemented within five years
- Allocations in the Local Plan: sites that are allocated in the Site Specific Policies and Proposals DPD or the Thetford Area Action Plan
- Windfalls<sup>1</sup>: the Council is satisfied that there is compelling evidence that such sites have consistently become available in the local area, and will continue to provide a reliable source of supply.

1.8 Totalling these components, the 5 Year Land Supply Statement shows that in Breckland **3,509** deliverable units are expected to come forward in the next five years.

1.9 To assess the Council’s 5 Year Land Supply position one must compare the identified supply against the requirement. As explained in paras 1.4 and 1.6 of this report, the 5 Year Land Supply Statement presents a number of different scenarios using both the Core Strategy targets and the emerging OAN target, and also both the Liverpool and Sedgefield methodological approaches.

1.10 Using either the Core Strategy target (on either methodology) or the OAN target (on either methodology) the Council cannot demonstrate a five year supply of housing land. The position against each scenario is shown below.

<b>Scenario</b>	<b>5 Year Land Supply Position</b>
Core Strategy target, Sedgefield methodology	2.44
Core Strategy target, Liverpool methodology	2.96
OAN target, Sedgefield methodology	4.28
OAN target, Liverpool methodology	4.73

1.11 Whilst the Council cannot currently demonstrate a 5 Year Land Supply, there are several positive things to note. The completions figures have been steadily increasing post-recession which indicates a strong housing market in the area. The new OAN targets, which are considered to be the most appropriate requirement figures by which to assess the 5 Year Land Supply position show a vastly improved picture. Furthermore, as noted at paras 4.4 and 4.5 of the Statement a significant number of recent planning approvals mean that it is likely that in the near future a five year supply will be achieved. It is considered that it would be appropriate to update the Statement at the end of September 2016.

## 2.0 **OPTIONS**

2.1 **Option 1** - Members note the content of this report and take into account Breckland’s Five Year Housing Land Supply (as at 31.03.16) in the determination of planning applications for residential developments.

2.2 **Option 2** – Do nothing

<sup>1</sup> Sites which do not currently have planning permission and are not allocated.

### 3.0 REASONS FOR RECOMMENDATION(S)

3.1 It is recommended that Members endorse Option 1. Local Planning Authorities are required through the NPPF and national PPG to prepare a statement setting out their five year housing land supply. This report has been prepared having had regard to this guidance

### 4.0 EXPECTED BENEFITS

4.1 The expected benefit associated with Option 1 is that the Council meets the requirements of the National Planning Practice Guidance.

### 5.0 IMPLICATIONS

#### 5.1 Carbon Footprint / Environmental Issues

5.1.1 It is the opinion of the Report Author that there are no implications.

#### 5.2 Constitution & Legal

5.2.1 It is the opinion of the Report Author that there are no implications.

#### 5.3 Contracts

5.3.1 It is the opinion of the Report Author that there are no implications.

#### 5.4 Corporate Priorities

5.4.1 This report aligns to the corporate priorities to support our local economy and develop stronger communities.

#### 5.5 Crime and Disorder

5.5.1 It is the opinion of the Report Author that there are no implications.

#### 5.6 Equality and Diversity / Human Rights

5.6.1 It is the opinion of the Report Author that there are no implications.

#### 5.7 Financial

5.7.1 It is the opinion of the Report Author that there are no implications.

#### 5.8 Health & Wellbeing

5.8.1 It is the opinion of the Report Author that there are no implications.

#### 5.9 Risk Management

5.9.1 It is the opinion of the Report Author that there are no implications.

#### 5.10 Safeguarding

5.10.1 It is the opinion of the Report Author that there are no implications.

## 5.11 Staffing

5.11.1 It is the opinion of the Report Author that there are no implications.

## 5.12 Stakeholders / Consultation / Timescales

5.12.1 It is the opinion of the Report Author that there are no implications.

## 6.0 WARDS/COMMUNITIES AFFECTED

6.1 All wards in Breckland are affected by the Five Year Housing Land Supply Statement.

## 7.0 ACRONYMS

- 7.1 DPD – Development Plan Document
- 7.2 NPPF – National Planning Policy Framework
- 7.3 OAN – Objectively Assessed Need
- 7.4 PPG – Planning Practice Guidance

**Key Decision:** No

**Exempt Decision:** No

### Appendices attached to this report:

Appendix A Breckland 5 Year Housing Land Supply Statement (as at 31.03.16)

## **Statement of Five Year Housing Land Supply (31.03.2016)**

**Published July 2016**

## **1. Introduction**

- 1.1. This Five Year Housing Land Supply Statement sets out Breckland District Council's residential land supply position as of 31 March 2016.
- 1.2. The National Planning Policy Framework (NPPF) seeks to ensure that the planning system delivers a flexible, responsive supply of housing development land to meet objectively assessed needs. It requires that Local Planning Authorities identify sufficient specific deliverable sites to deliver the next five years of housing provision.
- 1.3. The NPPF at paragraph 47 sets out the expectations on maintaining a five year supply for local authorities. In addition to being able to demonstrate five years worth of housing against the adopted housing requirements, it also requires an additional buffer to ensure choice and competition in the market for land.
- 1.4. This paper provides a detailed assessment of Breckland's housing land supply for the period 1<sup>st</sup> April 2016 to 31<sup>st</sup> March 2020. It identifies specific sites which the Council considers will deliver housing over this period. The 5 year land supply position will be reviewed annually; the next review will be due in 2017.

## 2. Housing Requirement

- 2.1. The first step in assessing a Council's 5 year land supply is to establish the correct housing requirement against which to test the identified supply.
- 2.2. The National Planning Practice Guidance (PPG) sets out at paragraph 30<sup>1</sup> what the starting point for calculating a five year land supply is. It states:

*“Housing requirement figures in up-to-date adopted Local Plans should be used as the starting point for calculating the five year supply. Considerable weight should be given to the housing requirement figures in adopted Local Plans, which have successfully passed through the examination process, unless significant new evidence comes to light. It should be borne in mind that evidence which dates back several years, such as that drawn from revoked regional strategies may not adequately reflect current needs.*

*Where evidence in Local Plans has become outdated and policies in emerging plans are not yet capable of carrying sufficient weight, information provided in the latest full assessment of housing needs should be considered. But the weight given to these assessments should take account of the fact they have not been tested or moderated against relevant constraints.”*

- 2.3. This guidance provides a clear steer as to the most appropriate requirement figures that should be used to calculate the five year land supply position.
- 2.4. It states that the starting point for calculating a five year land supply should be the requirement figures in an adopted Local Plan. Breckland has an adopted Core Strategy and Development Control Policies DPD. This document set the housing requirement for the Plan period 2001 – 2026 at 19,100 dwellings. The Core Strategy was produced in the context set by the East of England Regional Plan. As acknowledged in the supporting text of the Core Strategy (paragraph 3.4) Breckland has one of the highest District housing figures in the East of England Plan.
- 2.5. The revocation of the RSS and the introduction of the NPPF signalled a step change in the approach to be taken in providing for housing in England. Rather than top down figures being set by Regional Plans, which may have redistributed needs across the region, housing targets must now be worked out at a Housing Market Area level by Local Planning Authorities working together to establish their Objectively Assessed Need (OAN). This is acknowledged in the PPG where it states that evidence from revoked regional strategies may not adequately reflect current needs.
- 2.6. The Council has recently embarked on a Plan Review. As part of the new Plan production work, in conjunction with neighbouring authorities Norwich City, Broadland, North Norfolk, South Norfolk and the Broads Authority, under the Duty to Cooperate, a Strategic Housing Market Assessment (SHMA) has been produced to establish revised housing needs figures for the Housing Market Area. The SHMA concludes there is a need in Breckland for 14,313 units between 2012 and 2036, equivalent to 596 dwellings per annum (dpa)
- 2.7. The SHMA has not yet been tested at examination, and is not the only part of the evidence base which will need to be considered to establish housing targets in the new Local Plan. However, it is considered that the SHMA provides an objective and evidence based assessment of need and represents the most appropriate and up to date figure against which to assess housing supply. Using OAN instead of out-of-date regional targets has been supported in several recent S78 appeal decisions around the county.

---

<sup>1</sup> Reference ID: 3-030-20140306

2.8. The council considers that the housing requirement figures in the up-to-date SHMA provide a more appropriate assessment of need than the Core Strategy. For clarity a calculation of supply against each requirement figure is provided.

**Core Strategy Annual Requirement Figure 780**

**Objectively Assessed Need (OAN) Requirement Figure 596**

**Buffer**

2.9. The NPPF requires that Local Planning Authorities apply an additional buffer of 5% (moved forward from later in the plan period) to ensure choice and competition in the market for land. Where there has been a record of persistent under delivery of housing, Local Planning Authorities should increase the buffer to 20% (moved forward from later in the plan period) to provide a realistic prospect of achieving the required supply, and to ensure adequate market choice and competition for land.

2.10. The table below sets out the total completions since 2001. There has been a clear upward trend in completions post-recession. This is a positive indicator of the strength of housing delivery in Breckland going forward.

<b>Year</b>	<b>Actual Completions</b>
2001/2002	542
2002/2003	604
2003/2004	884
2004/2005	841
2005/2006	592
2006/2007	520
2007/2008	621
2008/2009	626
2009/2010	533
2010/2011	377
2011/2012	347
2012/2013	328
2013/2014	425
2014/2015	491
2015/2016	619
<b>Total</b>	<b>8,350</b>

2.11. When assessing delivery against the Core Strategy requirement there has been under-delivery in all but two years since 2001, and every year for the past 10 years. If assessing delivery against the OAN requirement since 2012, there has been under delivery in all but the last monitoring year. As a result it is considered appropriate to apply the 20% buffer.

**Shortfall**

2.12. As there has been under-delivery in recent years against the requirement the Council has accumulated a shortfall. The amount of shortfall (un-delivered requirement) to be taken into account will be different depending on which requirement is adopted.

2.13. If using the Core Strategy requirement: Between 2008<sup>2</sup> and 2016 3,746 dwellings have been completed in Breckland out of the required 6,240. This has led to a shortfall of 2,494 units.

2.14. If using the OAN requirement: As stated in the PPG “Objective current assessments of need will reflect the consequences of past under or over delivery of housing and should therefore address the question of how to deal with past delivery rates”. The Council therefore considers that only shortfall accrued since 2012, the base date of the SHMA period, should be addressed. Between 2012 and 2016 1,863 dwellings have been completed in Breckland out of the required 2,384. This has led to a shortfall of 521 units.

**Core Strategy Shortfall 2,494**

**Objectively Assessed Need (OAN) Shortfall 521**

2.15. There are two different approaches to making up the accumulated shortfall, the Liverpool method and the Sedgefield method. Using the Liverpool methodology, the past undersupply of housing is spread equally across the remainder of the plan period. The Sedgefield methodology requires the undersupply to be dealt with within the next five year period. The PPG states that Local Planning Authorities should aim to deal with any undersupply of housing within the first five years of the plan period where possible i.e. the Sedgefield approach.

2.16. However, Local Planning Authorities are not required to use the Sedgefield method and can take use the Liverpool method if it is more appropriate to do so. Given the high proportion of long term housing provision planned for the district through strategic urban extensions, the Council considers the Liverpool method is more suitable. For clarity the calculation using the Sedgefield method is also presented.

**Core Strategy Requirement Sedgefield methodology:**

Housing Target 2016 - 2021 (780 dwellings p/a)	3,900
Housing Target 2016 - 2021 (20% buffer applied)	4,680
Housing Shortfall (2008 - 2016)	2,494
Shortfall spread across next five years (2016 - 2021)	499 (2,494 / 5 years)
<b>Total Housing Requirement 1st April 2016 – 31st March 2021</b>	<b>7,174 (4,680 + 2,494)</b>
<b>Annualised Housing Requirement 2016 - 2021</b>	<b>1,435 (780 + 20% buffer + 499)</b>

**Core Strategy Requirement Liverpool methodology:**

Housing Target 2016 - 2021 (780 dwellings p/a)	3,900
Housing Target 2016 - 2021 (20% buffer applied)	4,680
Housing Shortfall (2008 - 2016)	2,494
Shortfall spread across remaining plan period (2016 - 2026)	249 (2,494 / 10 years)
<b>Total Housing Requirement 1st April 2016 – 31st March 2021</b>	<b>5,925 (4,680 + 249*5)</b>
<b>Annualised Housing Requirement 2016 - 2021</b>	<b>1,185 (780 + 20% buffer + 249)</b>

<sup>2</sup> In 2008, the East of England Plan (the Regional Spatial Strategy) was adopted and the existing housing shortfall (since 2001) was carried forward into the increase in required completions.

**OAN Requirement Sedgefield methodology:**

Housing Target 2016 - 2021 (596 dwellings p/a)	2,980
Housing Target 2016 - 2021 (20% buffer applied)	3,576
Housing Shortfall (2012 - 2016)	521
Shortfall spread across next five years (2016 - 2021)	104 (521 / 5 years)
<b>Total Housing Requirement 1st April 2016 – 31st March 2021</b>	<b>4,097 (3,576 + 521)</b>
<b>Annualised Housing Requirement 2016 - 2021</b>	<b>819 (596 + 20% buffer + 104)</b>

**OAN Requirement Liverpool methodology:**

Housing Target 2016 - 2021 (596 dwellings p/a)	2,980
Housing Target 2016 - 2021 (20% buffer applied)	3,576
Housing Shortfall (2012 - 2016)	521
Shortfall spread across remaining plan period (2016 - 2036)	27 (521 / 20 years)
<b>Total Housing Requirement 1st April 2016 – 31st March 2021</b>	<b>3,711 (3,576 + 27*5)</b>
<b>Annualised Housing Requirement 2016 - 2021</b>	<b>742 (596 + 20% buffer + 27)</b>

### 3. Housing Supply

- 3.1. Paragraph 47 of the NPPF sets out the requirements for a housing site to be considered a deliverable site for the purposes of the 5 year land supply. It states that in order for a site to be considered deliverable it should be:
- **Available** – the site is available for development now
  - **Suitable** – the site offers a suitable location for development and would contribute to the creation of sustainable, mixed communities
  - **Achievable** – there is a reasonable prospect that housing will be delivered on the site within five years
- 3.2. In addition to the NPPF, the PPG identifies the type of sites which can be considered against these criteria. It states that deliverable sites can include those that are allocated for housing in a development plan and sites with planning permission (outline or full that have not been implemented) unless there is clear evidence that schemes will not be implemented within five years. It also states that a windfall allowance may be included, where appropriate.
- 3.3. For Breckland, the housing land supply is made up of the following components:
- Sites with planning permission: large and small sites with planning permission are considered deliverable until permission expires or unless there is clear evidence that schemes will not be implemented within five years
  - Allocations in the Local Plan: sites that are allocated in the Site Specific Policies and Proposals DPD or the Thetford Area Action Plan
  - Windfalls: the Council is satisfied that there is compelling evidence that such sites have consistently become available in the local area, and will continue to provide a reliable source of supply.
- 3.4. It is considered that sites with planning permission are suitable and available, as this test was made at the planning application stage. When assessing sites achievability within a five year period, sites have been considered as either large or small sites. Large sites are those for 10 or more dwellings<sup>3</sup>, whilst small sites are those for less than ten dwellings. To further test deliverability of large sites with planning permission a questionnaire was sent to developers of those schemes seeking their intentions for development on the site. An example of the questionnaire can be seen at Appendix 1. Where a developer's intentions were unclear a 10% discount has been applied to the site to account for uncertainty.
- 3.5. Due to the number of small sites with planning permission, it is not practical to appraise each site individually. A 10% "lapse rate" has therefore been applied to provide flexibility. In concluding the delivery rate for small site permissions, the calculation has distributed projected completions evenly across the five years.
- 3.6. Allocations are regarded as deliverable; the Council has regular contact with the developers of these sites and is confident in their deliverability.
- 3.7. An assessment of windfall development within Breckland is included at Appendix 5 to this report. Analysis starts from 2010 as this was when the definition of residential gardens altered from brownfield to greenfield land. In addition the windfall allowance has looked specifically at the small scale sites with planning permission. Due to the future allocations coming forward in the Local Plan process, it was considered that if windfall development was included for large sites there could be an element of double counting. Furthermore, to avoid

---

<sup>3</sup> Large sites were defined having regard to the threshold for major planning applications.

double counting with the small sites with planning permission, the windfall allowance has only been applied from the second year of the five year period. A windfall allowance of 50 units per year has been applied in years 2-5.

3.8. The table below sets out the year on year expected delivery from the different components of supply – full site details are provided in appendices 2 – 4.

	<b>2016/17</b>	<b>2017/18</b>	<b>2018/19</b>	<b>2019/20</b>	<b>2020/21</b>	<b>Total</b>
Large sites with planning permission	395	563	614	508	396	2311 <sup>4</sup>
Small sites with planning permission <sup>5</sup>	100	100	100	100	99	499 <sup>5</sup>
Windfall Development	0	50	50	50	50	200
Allocations without planning permission	0	62	80	167	190	499
<b>Total</b>	<b>495</b>	<b>775</b>	<b>844</b>	<b>825</b>	<b>735</b>	<b>3,509</b>

3.9. The total deliverable supply in Breckland is **3,509** units.

<sup>4</sup> 10% discount applied to sites where delivery has not been confirmed by developer. See Appendix 2.

<sup>5</sup> This is the total small sites with permission with the 10% lapse rate applied. There are currently 555 units with permission. This is discounted by a rounded up 10% (-56) to a new total of 499 deliverable units, spread evenly over the 5 year period.

#### 4. Conclusions

- 4.1. As established in section 3 of this paper the Council has a supply of 3,509 deliverable dwellings which are expected to be built out over the next five year period. These include sites with planning permission, allocations and windfall sites.
- 4.2. To assess whether the Council has a five year supply of housing land the amount of deliverable supply must be compared to the requirement as established in section 2 of this paper. As discussed a number of scenarios are presented using both the Core Strategy targets and the emerging OAN target, and also both the Liverpool and Sedgefield methodological approaches.

##### **Core Strategy Requirement Sedgefield methodology:**

Annualised housing Requirement	Total annual housing requirement (2016 - 2021) including 20% buffer and meeting shortfall in the next 5 years		<b>1,435</b>
Total five year supply breakdown	Large sites with planning permission	2311	<b>3,509</b>
	Small sites with planning permission	499	
	Windfall Development	200	
	Allocations	499	
Total five year supply	Supply / Requirement (3,509 / 1,435)		<b>2.44</b>

##### **Core Strategy Requirement Liverpool methodology:**

Annualised housing Requirement	Total annual housing requirement (2016 - 2021) including 20% buffer and meeting shortfall over the plan period		<b>1,185</b>
Total five year supply breakdown	Large sites with planning permission	2311	<b>3,509</b>
	Small sites with planning permission	499	
	Windfall Development	200	
	Allocations	499	
Total five year supply	Supply / Requirement (3,509 / 1,185)		<b>2.96</b>

##### **OAN Requirement Sedgefield methodology:**

Annualised housing Requirement	Total annual housing requirement (2016 - 2021) including 20% buffer and meeting shortfall in the next 5 years		<b>819</b>
Total five year supply breakdown	Large sites with planning permission	2311	<b>3,509</b>
	Small sites with planning permission	499	
	Windfall Development	200	
	Allocations	499	
Total five year supply	Supply / Requirement (3,509 / 819)		<b>4.28</b>

**OAN Requirement Liverpool methodology:**

Annualised housing Requirement	Total annual housing requirement (2016 - 2021) including 20% buffer and meeting shortfall over the plan period		<b>742</b>
Total five year supply breakdown	Large sites with planning permission	2311	<b>3,509</b>
	Small sites with planning permission	499	
	Windfall Development	200	
	Allocations	499	
Total five year supply	Supply / Requirement (3,509 / 742)		<b>4.73</b>

- 4.3. As can be seen from the calculations above using either the Core Strategy target (on either methodology) or the OAN target (on either methodology) the Council cannot demonstrate a five year supply of housing land.
- 4.4. This statement sets out the position as at 31<sup>st</sup> March 2016. This is the base date at which full information on both completions and commitments is available. However, it is interesting to note that since the base date the Council has already permitted 405 dwellings since 1<sup>st</sup> April 2016 (as at 1<sup>st</sup> July 2016). These units have not been counted in the 5 year land supply statement as they have been granted permission after the base date of the Statement; nevertheless, they show that the pipeline of sites coming forward in Breckland is strong. Within the first 3 months of the monitoring year the Council have permitted 69% of the annual OAN requirement.
- 4.5. This is a strong indication of the direction of travel for housing provision in the district. It is highly likely that the Council will be able to demonstrate a 5 year supply of housing land in the near future.

<b>2025/26</b>	
<b>Post 2026</b>	

## Appendix 2: Large sites with planning permission

The table below shows the sites with extant planning permission for more than 10 units. The Council has contacted developers of the sites to discuss the deliverability of their permission. Where a developer's intentions were unclear a judgement has been made on likely build out based on local evidence. To add robustness where the developer has not confirmed the expected build out a 10% discount has been applied to the units on that site.

<b>Total</b>		<b>600</b>	<b>555</b>

There are a total of 555 units on extant planning permissions remaining to be built out. Applying a rounded up 10% discount to this figure (- 56 units) the total number of units to be counted from small sites is 499.

## Appendix 5: Windfall analysis

The following table shows the windfall development which has been completed in Breckland since 2010. Information has been taken from the Council's monitoring database. Analysis starts from 2010 as this was when the definition of residential gardens altered from brownfield to greenfield land.

Year	Small sites (windfalls)	Large sites (windfalls)	Total windfalls	Total Completions	% of total completions that are windfalls
2010/2011	172	202	374	377	99%
2011/2012	115	187	302	347	87%
2012/2013	86	211	297	328	90%
2013/2014	148	199	347	425	82%
2014/2015	161	281	442	491	90%
2015/2016	174	307	481	619	77%
<b>Total</b>	<b>856</b>	<b>1,387</b>	<b>2,243</b>	<b>2,587</b>	
<b>Average</b>	<b>143</b>	<b>231</b>	<b>374</b>		

The analysis above shows that Breckland District has a strong track record of windfall delivery.

Due to the future allocations coming forward in the Local Plan process, it was considered that if windfall development was included for large sites there could be an element of double counting.

Over the last six years, the average annual windfall development on small sites is **143** units.

To further avoid double counting with small sites that currently have planning permission, the windfall allowance has only been applied from the second year of the five year period.

The Council is adopting a cautionary approach to expected delivery from windfall sites and an annual expectation of **50** units per year from windfalls is adopted in the five year supply (years 2-5).
