

APPENDIX B: Consultation Comments

| <u>Page Ref</u> | <u>Comments</u> | <u>Date Received</u> |
|-----------------|--|----------------------|
| Page 8 | Instead of – Optimise the value of land owned by the Council, it should read – Optimise the value of property assets owned by the Council. Property is the generic and industry used terms for land and buildings, therefore this would be more appropriate as we are trying to optimise a whole range of property assets, not just our land | 28/09/2011 |
| | I should like to make the following comments in respect of the draft corporate plan: The plan makes great focus on the work of Sustainable Communities, Environmental Services and Economic Development however significant work is also carried out by the Environmental Health and Licensing teams to protect the health and wellbeing of local residents and workers and protecting the environment and I would ask that some of this work is included within the priorities and future focus of the plan. | 30/09/2011 |
| Page 9 | Front office – may not be understood by customers. Maybe should look at stating that we will design our services to be customer focussed or words to that effect | 05/10/2011 |
| | It would be nice to see reference to some of the good work that the Environmental Health department carries out particularly under the 'Pride in Breckland' and Stronger Communities' priorities | 06/10/2011 |
| Page 4 & Page 8 | "Optimise the value of land owned by the council" and "Commence the building of homes on land owned by the council", seem to be at odds with the point on page 4: - "Ensure communities are developed in a sensitive and sustainable way to protect our environment". | 13/10/2011 |
| Page 9 | Suggest rewording: <i>"Transfer our IT servers to a virtual server reducing energy costs and our carbon footprint"</i> It sounds like we have only 1 server (we don't) and we are doing it only for the Green agenda. We are carrying out virtualisation for a range of activities: to reduce costs, having a flexible infrastructure, reducing overheads, administration of back-ups etc | 13/10/2011 |
