

## BRECKLAND DISTRICT COUNCIL

**Report of:** Councillor Mark Robinson- Executive Member for Customer, Digital and Performance

**To:** Overview and Scrutiny Commission- 22<sup>nd</sup> July 2021

**Author:** Ryan Pack- Innovation and Change Business Partner

**Subject:** Key Performance Indicators revision for 2021/22 performance cycle

**Purpose:** To provide members of the commission discuss proposed changes to the upcoming 2021/22 performance cycle.

### **Recommendation(s):**

- 1) Members of the commission are asked to note the report.

### **1.0 BACKGROUND**

- 1.1 Key performance indicators (KPI's) are indicators that highlight the health, standard of service and direction of the council, whether progress is being made towards strategic goals and if statutory regulations are being met.
- 1.2 A KPI differs from a regular performance indicator due to it being labelled as key. In some cases, this may mean it is the amalgamation of two performance indicators or the result of multiple deliverables. They reflect only the most important goals across the organisation, so they will only be a small proportion of all the indicators measured.
- 1.3 The council currently reports a combination of 31 KPI's and PI's to form the quarterly performance report. These make up a fraction of the overall number of indicators and statistics collected by the council including statutory returns, which the council must make to central government.
- 1.4 It is also important to differentiate a KPI with a statistic, which is data and information that the council cannot directly control. This is an important difference to make as using statistics in place of KPI's means that a true understanding of how the council is performing would not be reported.
- 1.5 Focusing on the wrong metrics or too many metrics can be detrimental to understanding the council's performance. A good set of performance metrics should be a balance between a comprehensive picture of the organisation whilst also being concise.
- 1.6 KPI's are informally discussed through various internal officer led mechanisms within the council such as performance board, Executive Management Team meetings (EMT) and through ad-hoc meetings where performance is deemed to be falling.
- 1.7 Formally performance reporting can best be seen through the quarterly performance reports which are seen by the Overview and Scrutiny Committee. This committee has a constitutional role in scrutinising the council's performance management.

- 1.8 Members of the Overview and Scrutiny Committee have requested that a review of the council's current key performance indicators be brought before them as part of both an annual review and in light of the newly agreed corporate plan.
- 1.9 KPI's should be set against the council's corporate plan, which sets out its strategic objectives and goals for the upcoming period. These two elements must be interlinked as setting KPI's which do not match with these objectives can create confusion as to if the council is performing against what it sets out to achieve.
- 1.10 The data availability period of reporting should also be considered when setting new KPI's. As the council reports its performance quarterly, it should avoid using data that is only reported/compiled annually, as this would result in the same number being submitted four times a year.
- 1.11 Furthermore, staff time should also be taken into consideration when setting new indicators. Indicators that take a large amount of staff time to compile due to complexity or current system should not be considered as viable in the short term. Work should however be done to see if they can be reported on in the future.
