

Note 1 – Accounting Policies

General Principles

The Statement of Accounts summarises the Council's transactions for the 2018-19 financial year and its position at the year end of 31 March 2019. The Council is required to prepare an annual Statement of Accounts by the Accounts and Audit Regulations 2015, which those Regulations require to be prepared in accordance with proper accounting practices. These practices under Section 21 of the 2003 Act primarily comprise the Chartered Institute of Public Finance and Accountancy (CIPFA) Code of Practice on Local Authority Accounting in the United Kingdom 2018-19, supported by International Financial Reporting Standards (IFRS). The accounting convention adopted in the Statement of Accounts is principally historical cost, modified by the revaluation of certain categories of non-current assets and financial instruments.

Accruals of Income and Expenditure

Activity is accounted for in the year that it takes place, not simply when cash payments are made or received. In particular:

- Revenue from contracts with service recipients, whether for services or the provision of goods is recognised when (or as) the goods or services are transferred to the service recipient in accordance with the performance obligations in the contract.
- Expenses in relation to services received (including services provided by employees) are recorded as expenditure when the services are received rather than when payments are made.
- Interest payable on borrowings and receivable on investments is accounted for respectively as expenditure or income on the basis of the effective interest rate for the relevant financial instrument rather than the cash flows fixed or determined by the contract.
- Where income or expenditure has been recognised but cash has not been received or paid, a debtor or creditor for the relevant amount is recorded in the Balance Sheet. Where it is doubtful that debts will be settled, the balance of debtors is written down and a charge made to revenue for the income that might not be collected.

Cash and Cash Equivalents

Cash is represented by cash in hand and deposits with financial institutions repayable without penalty on notice of not more than 24 hours. Cash equivalents are investments that are instant access and that are readily convertible to known amounts of cash with insignificant risk of change in value.

In the Balance Sheet and Cash Flow Statement, cash and cash equivalents are shown net of bank overdrafts that are repayable on demand and form an integral part of the Council's cash management.

Charges to Revenue for Non-Current Assets

Services, support services and trading accounts are debited with the following amounts to record the cost of holding non-current assets during the year:

- Depreciation attributable to the assets used by the relevant service;
- Revaluation and impairment losses on assets used by the service where there are no accumulated gains in the Revaluation Reserve against which the losses can be written off; and
- Amortisation of intangible assets attributable to the service.

The Council is not required to raise council tax to fund depreciation, revaluation and impairment losses or amortisation. However, it is required to make an annual contribution from revenue towards the reduction in its overall borrowing requirement. Whilst the Council does not have an overall borrowing

requirement, there is an amount implicit in the PFI repayment relating to Minimum Revenue Provision (MRP). Depreciation, revaluation, impairment losses and amortisation are therefore replaced by an adjusting transaction between the Capital Adjustment Account and the Movement in Reserves Statement which reverses out the amount charged so that there is no impact on the level of council tax.

Collection Fund

This account is an agent's statement that reflects the statutory obligation for billing authorities to maintain a separate Collection Fund. The statement shows the transactions of the billing authority in relation to the collection from taxpayers and distribution of council tax and non-domestic rates (NNDR) to major preceptors, local authorities and the Government.

An allowance for the impairment of debt is calculated for the Collection Fund using the following bases:

- Council Tax – An un-collectable percentage is applied to the debt outstanding for each year based on the age of that debt.
- NNDR – An un-collectable percentage is applied to the debt outstanding based on the current collection status of that debt (i.e. under instalments, under enforcement, etc).

An allowance for impairment from NNDR appeals from the 2010 valuation list is calculated by taking the outstanding appeals at the Valuation Office (VO), categorising these by the rating list descriptions and applying an estimate to the likely success of each outstanding appeal using historical statistics of appeals settled in each category. For NNDR appeals relating to the 2017 valuation list an assessment is made of the likely reduction in rateable value based on the change in value between 2010 and 2017 and the premises category and then applying an estimate of value of a successful appeal, plus an estimate of any lodged appeals using the same process as under the 2010 list. In addition a review on high risk properties such as high rateable value, large infrastructure, change to charities, etc is undertaken and an estimate made for appeals on these properties if required.

The council tax and NNDR income included in the Comprehensive Income & Expenditure Statement is the council's share of accrued income for the year. However, regulations determine the amount of council tax and NNDR that must be included in the Council's General Fund. Therefore, the difference between the income included in the Comprehensive Income & Expenditure Statement and the amount required by regulation to be credited to the General fund is taken to the Collection Fund Adjustment Account and included as a reconciling item in the Movement in Reserves Statement. The Balance Sheet includes the Council's share of the year end balances in respect of council tax and NNDR relating to arrears, impairment allowance for doubtful debts, overpayments and prepayments and appeals.

Employee Benefits

Benefits Payable During Employment

Short-term employee benefits, such as salaries and paid annual leave for current employees, are those due to be settled wholly within 12 months of the year-end. They are recognised as an expense for services in the year in which employees render services to the Council and charged on an accrual basis to the relevant service line of the comprehensive Income and Expenditure Statement.

Termination Benefits

Termination benefits are amounts payable as a result of a decision by the Council to terminate an officer's employment before the normal retirement date or an officer's decision to accept voluntary redundancy in exchange for those benefits and are charged on an accruals basis to the appropriate service segment at the earlier of when the Council can no longer withdraw the offer of those benefits or when the Council recognises costs for a restructuring.

Post Employment Benefits

Employees of the Council are members of the Local Government Pension Scheme (LGPS), administered by Norfolk County Council, which provides defined benefits to members (retirement lump sums and pensions), earned as employees work for the Council. It is accounted for as a defined benefits scheme:

- The liabilities of the pension scheme attributable to the Council are included in the Balance Sheet on an actuarial basis using the projected unit method – i.e. an assessment of the future payments that will be made in relation to retirement benefits earned to date by employees, based on assumptions about mortality rates, employee turnover rates, etc and projections of projected earnings for current employees.
- Liabilities are discounted to their value at current prices, using a discount rate based on the indicative rate of return on high quality corporate bonds.
- The assets of the Norfolk County Council pension fund attributable to the Council are included in the Balance Sheet at their bid value.
- The change in the net pensions liability is analysed into the following components:
 - Service cost comprising:
 - Current Service Cost – the increase in liabilities as a result of years of service earned this year – allocated in the Comprehensive Income and Expenditure Statement to the services for which the employees worked.
 - Past Service Cost - the increase in liabilities as a result of a scheme amendment or curtailment whose effect relates to years of service earned in earlier years – debited to the Surplus or Deficit on Provision of Services in the Comprehensive Income and Expenditure Statement.
 - Net Interest on the net defined liability, ie. Net interest expense for the Council – the change during the period in the net defined liability that arises from the passage of time charged to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement – this is calculated by applying the discount rate used to measure the defined benefit obligation at the beginning of the period to the net defined liability at the beginning of the period – taking into account any changes in the net defined benefit liability during the period as a result of contribution and benefit payments.
 - Re-measurements comprising:
 - Return on Plan Assets – excluding amounts included in net interest on the net defined liability – charged to the Pensions Reserve as Other Comprehensive Income and Expenditure.
 - Actuarial Gains and Losses – changes in the net pensions liability that arise because events have not coincided with assumptions made at the last actuarial valuation or because the actuaries have updated their assumptions – charged to the Pensions Reserve as Other Comprehensive Income and Expenditure.
 - Contributions paid to the Pension Fund – cash paid as employer’s contributions to the pension fund in settlement of liabilities; not accounted for as an expense

In relation to retirement benefits, statutory provisions require the General Fund balance to be charged with the amount payable by the Council to the pension fund or directly to pensioners in the year, not the amount calculated according to the relevant accounting standards. In the Movement in Reserves Statement, this means that there are appropriations to and from the Pensions Reserve to remove the notional debits and credits for retirement benefits and replace them with debits for the cash paid to the pension fund and pensioners and any such amounts payable but unpaid at the year end. The negative balance that arises on the Pensions Reserve thereby measures the beneficial impact to the General Fund of being required to account for retirement benefits on the basis of cash flows rather than as benefits are earned by employees.

Discretionary Benefits

The Council also has restricted powers to make discretionary awards of retirement benefits in the event of early retirements. Any liabilities estimated to arise as a result of an award to any member of staff are accrued in the year of the decision to make the award and accounted for using the same policies as are applied to the Local Government Pension Scheme.

Estimation Techniques

Where estimated figures have been used in the accounts (for example, in the preparation of Pension Fund liabilities) the assumptions have been stated either in the relevant notes to the accounts or in note 29 *Assumptions made about the future and other major sources of estimation uncertainty*.

Events after the Balance Sheet Date

Events after the Balance Sheet date are those events, both favourable and unfavourable, that occur between the end of the reporting period and the date when the Statement of Accounts are authorised for issue. Two types of event can be identified:

- Those that provide evidence of conditions that existed at the end of the reporting period – the Statement of Accounts is adjusted to reflect such events
- Those that are indicative of conditions that arose after the reporting period – the Statement of Accounts is not adjusted to reflect such events, but where a category of events would have a material effect, disclosure is made in the notes of the nature of the events and their estimated financial effect.

Events taking place after the date of authorisation for issue are not reflected in the Statement of Accounts.

Fair Value Measurement

The Council measures some of its non-financial assets, such as surplus assets and investment properties, at fair value at each reporting date. Fair value is the price that would be received to sell an asset in an orderly transaction between market participants at the measurement date. The fair value measurement assumes that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The Council measures the fair value of an asset or liability using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

When measuring fair value of a non-financial asset, the Council takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use. The Council uses valuation techniques that are appropriate in the circumstances and for which sufficient data is available, maximising the use of relevant observable inputs and minimising the use of unobservable inputs. Inputs to the valuation techniques in respect of assets or liabilities for which fair value is measured or disclosed in the Council's financial statements are categorised within the fair value hierarchy as follows:

- Level 1 – quoted prices in active markets for identical assets or liabilities that the Council can access at the measurement date
- Level 2 – inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly
- Level 3 – unobservable inputs for the asset or liability.

Financial Instruments

Financial Liabilities

The policy for any financial liabilities the Council holds which are classed as leases or PFI are detailed within the policy for that classification.

Financial Assets

Financial assets are classified based on a classification and measurement approach that reflects the business model for holding the financial assets and their cash flow characteristics. There are 3 main classes of financial assets measured at:

- Amortised cost
- Fair value through profit and loss (FVPL)
- Fair value through other comprehensive income (FVOCI)

The Council's business model is to hold investments to collect contractual cash flows. Financial assets are therefore classified as amortised cost.

Financial assets measured at amortised cost are recognised on the Balance Sheet when the Council becomes a party to the contractual provisions of a financial instrument and are initially measured at fair value and subsequently measured at their amortised cost. Annual credits for interest receivable are made to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement, based on the carrying amount of the investment/asset multiplied by the effective rate of interest for the instrument.

Government Grants and Contributions

Whether paid on account, by instalments or in arrears, government grants and third party contributions and donations are recognised as due to the Council when there is reasonable assurance that;

- the Council will comply with the conditions attached to the payments and
- the grants or contributions will be received.

Amounts recognised as due to the Council are not credited to the Comprehensive Income and Expenditure Statement until conditions attached to the grant or contribution have been satisfied (conditions are stipulations that specify that the future economic benefits or service potential embodied in the asset acquired using the grant or contribution are required to be consumed by the recipient as specified, or future economic benefits or service potential must be returned to the transferor).

Monies advanced as grants and contributions for which conditions have not been satisfied are carried in the Balance Sheet as creditors. When conditions are satisfied, the grant or contribution is credited to the relevant service line (for attributable revenue grants and contributions) or Taxation and Non-Specific Grant Income (for non-ringfenced revenue grants and all capital grants) in the Comprehensive Income and Expenditure Statement.

Where capital grants are credited to the Comprehensive Income and Expenditure Statement, they are reversed out of the General Fund Balance in the Movement in Reserves Statement. Where the grant has yet to be used to finance capital expenditure, it is posted to the Capital Grants Unapplied Account. Where it has been applied, it is posted to the Capital Adjustment Account. Amounts in the Capital Grants Unapplied Account are transferred to the Capital Adjustment Account once they have been applied to fund capital expenditure.

Certain grants are general grants allocated by Central Government directly to local authorities as revenue funding, these are non-ringfenced and are credited to Taxation and Non-Specific Grant Income in the Comprehensive Income and Expenditure Statement. Details of these grants can be found in note 17 *Grant Income*.

Heritage Assets

Historical Buildings – These items are reported in the Balance Sheet at valuation and depreciation is provided for, if necessary, in accordance with the Council's general policies for depreciation (see the section on Property, Plant and Equipment in this note).

The Council's heritage assets consist of one building, the Charles Burrell Museum which opened in 1991 and the land on which it is sited. Previously it was the site of the former paint shop for the steam engine manufacturer and is now held as a museum for its cultural contribution rather than for any other purpose. The valuation is based on its existing use.

Intangible Assets

Expenditure on non-monetary assets that do not have physical substance but are controlled by the Council as a result of past events (i.e. software licences) is capitalised when it is expected that future economic benefits or service potential will flow from the intangible asset to the Council for more than one financial year. The Council accounts for its software as intangible assets. The carrying amount of intangible assets is amortised on a straight line basis and is charged to the ICT cost centre and then absorbed as an overhead across all the service headings in the Cost of Services.

Intangible assets are initially measured at cost and are carried at amortised cost. The depreciable amount of the intangible asset is amortised over its useful life (based on internal assessments of the period the software is expected to be of use to the Council) to the relevant service line(s) in the Comprehensive Income and Expenditure Statement. Depreciation is calculated on the following basis:

- Computer software and licences – straight line allocation over 3 years

Where expenditure on intangible assets qualifies as capital expenditure for statutory purposes, amortisation and disposal gains and losses are not permitted to have an impact on the General Fund Balance. The gains and losses are therefore reversed out of the General Fund Balance in the Movement in Reserves Statement and posted to the Capital Adjustment Account and (for any disposal proceeds greater than £10,000) the Capital Receipts Reserve.

Interest in Companies and Other Entities

The Anglia Revenues Partnership Joint Committee - This involves a group of authorities coming together to fulfil a joint purpose but it does not constitute a legal entity in its own right. It is accounted for in the respective authorities Statements of Accounts as a shared service. This requires the authority's share of partnership transactions (expenditure and income and balances if applicable) to be included within the relevant lines within the authority's accounts.

Anglia Revenues Partnership (ARP) Trading Ltd - This is a legal entity conducted under joint control. The company became dormant in June 2018.

Breckland Bridge Ltd – This is the Local Asset Backed Vehicle (LABV) company set up between the Council and The Land Group Ltd. The company has been set up to achieve financial returns and accelerate long term regeneration and economic growth to projects in the Council area with a view to maximising revenue whilst securing the economic, social, and environmental well-being of the Council area. This company is classified as a Joint Venture in the Councils accounts and group accounts are prepared on this basis. Please refer to the group accounts section of this document.

The Related Party Transactions note give details on these entities.

Investment Property

Investment properties are those that are used solely to earn rentals and/or for capital appreciation. The definition is not met if the property is used in any way to facilitate the delivery of services or production of goods.

Investment properties are measured initially at cost and subsequently at fair value, being the price that would be received to sell such an asset in an orderly transaction between market participants at the measurement date. As a non-financial asset, investment properties are measured at highest and best use. Properties are not depreciated but are revalued annually according to market conditions at the year-end. Valuations are in accordance with the Statements of Asset Valuation Principles and Guidance Notes issued by the Royal Institution of Chartered Surveyors (RICS). Gains and losses on revaluation and on disposal are posted to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement.

Rentals received in relation to investment properties are credited to the 'Surplus/Deficit on trading undertakings not included in Cost of Services' line and result in a gain for the General Fund Balance. However revaluation and disposal gains and losses are not permitted by statutory arrangements to have an impact on the General Fund Balance. The gains and losses are therefore reversed out of the General Fund Balance in the Movement in Reserves Statement and posted to the Capital Adjustment Account and (for any disposal proceeds greater than £10,000) the Capital Receipts Reserve.

Where part of an investment property is replaced (i.e. subsequent capital expenditure), the carrying amounts of the parts replaced are de-recognised (where material) and the cost of replacement is recognised in the carrying value of the property.

Leases

Leases are classified as finance leases where the terms of the lease transfer substantially all the risks and rewards incidental to ownership of the property, plant or equipment from the lessor to the lessee. All other leases are classified as operating leases. Where a lease covers both land and buildings, the land and buildings elements are usually considered separately for classification.

Authority as Lessor

Operating Leases – Where the Council grants an operating lease over a property, the asset is retained in the Balance Sheet. Rental income is credited to the relevant line in the Comprehensive Income and Expenditure Statement (i.e. Surplus/Deficit on trading undertakings). Credits are made on a straight line basis over the life of the lease, even if this does not match the pattern of payments (eg. there is a rent free period).

Finance leases – Where the Council grants a finance lease over a property, the relevant asset is written out of the Balance Sheet as a disposal. At the commencement of the lease, the carrying amount of the asset in the Balance Sheet is written off to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. A gain, representing the Council's net investment in the lease, is credited to the same line in the Comprehensive Income and Expenditure Statement also as part of the gain or loss on disposal (i.e. netted off against the carrying value of the asset at the time of disposal), matched by a lease (long term debtor) asset in the Balance Sheet.

Lease rentals receivable are apportioned between:

- A charge for the acquisition of the interest in the asset - applied to write down the lease debtor (together with any premiums received); and
- Finance income (credited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement).

The gain credited to the Comprehensive Income and Expenditure Statement on disposal is not permitted by statute to increase the General Fund Balance and is required to be treated as a capital receipt. Where a premium has been received, this is posted out of the General Fund Balance to the Capital Receipts Reserve in the Movement in Reserves Statement. Where the amount due in relation to the lease is to be settled by the payment of rentals in future financial years, this is posted out of the General Fund Balance to the Deferred Capital Receipts Reserve in the Movement in Reserves Statement. When the

future rentals are received, the element for the capital receipt for the disposal of the asset is used to write down the lease debtor. At this point the deferred capital receipts are transferred to the Capital Receipts Reserve.

The written-off value of disposals is not a charge against council tax, as the cost of non-current assets is fully provided for under separate arrangements for capital financing. Amounts are therefore appropriated to the Capital Adjustment Account from the General Fund Balance in the Movement in Reserves Statement.

Overheads and Support Services

The costs of overheads and support services are charged to service segments in accordance with the council's arrangements for accountability and financial performance.

Private Finance Initiative (PFI)

PFI contracts are agreements to receive services, where the responsibility for making available the non-current assets needed to provide the service passes to the PFI contractor. Breckland entered into a 33.5 year PFI contract for the provision of leisure management and facilities in December 2005. Changes to the 2009 Statement of Recommended Practice resulted in the council re-examining its accounting treatment in the context of the International Financial Reporting Standards, and in particular under the interpretations from the International Financial Reporting Interpretations Committee and determining that the arrangement should be accounted for as a service concession arrangement within the scope of IFRIC 12.

The annual unitary payment is split between lease payments, service & revenue expenditure and asset lifecycle costs. The allocation of this unitary payment is estimated based on the terms of the payment mechanism in the PFI contract. Therefore the annual unitary charge for each facility is allocated 50% to the lease payment and the remaining 50% to cover service & revenue costs and asset lifecycle costs. The amounts are allocated between the two sites based on information in the operators' model giving a split of 55% Thetford and 45% Dereham. A mark up of 2% has been applied in order to estimate the fair value of the real maintenance and lifecycle services. This mark up has been calculated as the difference between the total real costs (as per the operator model) and 50% of the unitary charge (in real terms).

Property used under the PFI contract is recognised as an asset on the Balance Sheet, with a related liability also recognised. The fair value of the PFI assets at completion of construction was determined in reference to the construction costs disclosed in the operators' financial model. The existing buildings at the Thetford site have been included at their net book value at the relevant date. Where the property is enhanced by the PFI operator, the fair value of the enhancement is recognised in the Balance Sheet of the Council. A day 1 revaluation gain has been recorded in relation to the District Valuer (DV) valuation carried out at 1 April 2007. Assets have been split between the Thetford and Dereham sites with the split of construction costs between the two centres being based on the assumption applied for unitary payments (55% Thetford and 45% Dereham). The assets are depreciated on a straight line basis over the useful life of the asset as estimated by the valuer.

Capital lifecycle costs are treated as a prepayment amount (allocated on a straight line basis over the contract term). When the capital improvement works are undertaken by the contractor (based on their financial model) the relevant amount of the capital expenditure will then be reclassified from prepayments to non-current assets. Assets are re-valued every 3 years as part of the Council's rolling programme of valuations and the non-current asset values are updated as necessary (in line with the Property, Plant and Equipment Policy).

Property, Plant and Equipment (PPE)

Assets that have physical substance and are held for use in the production or supply of goods or services, for rental to others, or for administrative purposes and that are expected to be used during more than one financial year are classified as property, plant and equipment.

Recognition

Expenditure on the acquisition, creation or enhancement of Property, Plant and Equipment (PPE) is capitalised on an accruals basis, provided that it is probable that the future economic benefits or service potential associated with the item will flow to the Council and the cost of the item can be measured reliably. Expenditure that maintains but does not add to an asset's potential to deliver future economic benefits or service potential (i.e. repairs and maintenance) is charged as an expense when it is incurred.

A de-minimus level of £20,000 has been adopted for the inclusion of non-current assets in all categories with the exception of surplus land, which has no de-minimus level, vehicles and equipment which have a de-minimus level of £10,000 and grant funding received which also has no de-minimus.

Measurement

Assets are initially measured at cost, comprising; the purchase price, any costs attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management and (if applicable) the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located.

Assets are then carried in the Balance Sheet using the following measurement bases:

- Council Offices – current value, determined as the amount that would be paid for the asset in its existing use (existing use value – EUV)
- Infrastructure, community assets and assets under construction – depreciated historical cost
- Surplus Assets – fair value, estimated at highest and best use from a market participant's perspective
- All Other Assets – current value, determined as the amount that would be paid for the asset in its existing use (existing use value – EUV)

Assets included in the Balance Sheet at current value are revalued sufficiently regularly to ensure that their carrying amount is not materially different from their current value at the year-end, but as a minimum every five years. In practice assets are valued within a five year rolling programme but due to the grouping of classes of assets they are usually valued every three years. Valuations are in accordance with the methodologies and bases for estimation set out in the professional standards of the Royal Institution of Chartered Surveyors (RICS).

Increases in valuation are matched by credits to the Revaluation Reserve to recognise unrealised gains. Exceptionally, gains might be credited to the Comprehensive Income and Expenditure Statement where they arise from the reversal of a valuation loss previously charged to a service.

Where decreases in value are identified, they are accounted for by:

- Where there is a balance of revaluation gains for an asset in the revaluation reserve, the carrying amount of the asset is written down against that balance (up to the amount of the accumulated gains).
- Where there is no balance in the Revaluation Reserve or an insufficient balance, the carrying amount of the asset is written down against the relevant service line(s) in the Comprehensive Income and Expenditure Statement.

The Revaluation Reserve contains revaluation gains recognised since 1 April 2007 only, the date of its formal implementation. Gains arising before that date have been consolidated into the Capital Adjustment Account.

Impairment

Assets are assessed each year-end as to whether there is any indication that an asset may be impaired. Where indications exist and any possible differences are estimated to be material, the recoverable amount of the asset is estimated and, where this is less than the carrying amount of the asset, an impairment loss is recognised for the shortfall.

Where impairment losses are identified, they are accounted for by:

- Where there is a balance of revaluation gains for an asset in the revaluation reserve, the carrying amount of the asset is written down against that balance (up to the amount of the accumulated gains).
- Where there is no balance in the Revaluation Reserve or an insufficient balance, the carrying amount of the asset is written down against the relevant service line(s) in the Comprehensive Income and Expenditure Statement.

Where an impairment loss is reversed subsequently, the reversal is credited to the relevant service line(s) in the Comprehensive Income and Expenditure Statement, up to the amount of the original loss, adjusted for depreciation that would have been charged if the loss had not been recognised.

Depreciation

Depreciation is provided for on all Property, Plant and Equipment assets by the systematic allocation of their depreciable amounts over their useful lives. An exception is made for assets without a determinable finite useful life (i.e. freehold land) and assets that are not yet available for use (i.e. assets under construction).

Depreciation is calculated on the following bases:

- Buildings – straight line allocation over the useful life of the property as estimated by the valuer (ranges from 4 to 68 years)
- Car Parks – straight line allocation over the useful life of the property as estimated by the valuer (ranges from 3 to 29 years)
- Infrastructure – straight line allocation over the useful life of the property as estimated by the valuer (21.5 years)
- Vehicles, plant, furniture and equipment – straight line method using internally assessed useful economic lives (ranges from 1 to 3 years)

Revaluation gains are also depreciated, with an amount equal to the difference between current value depreciation charged on assets and the depreciation which would have been chargeable based on their historical cost being transferred each year from the Revaluation Reserve to the Capital Adjustment Account.

Componentisation

Where an item of PPE asset has major components whose cost is significant in relation to the total cost of the asset and whose useful life differs, the components are depreciated separately, unless the componentisation makes no material difference to the overall depreciation charge. The following de-minimus levels have been set for componentisation of an asset (as the values are not considered significant in relation to componentisation):

- Assets with a total cost of £100,000 or less will not be subject to componentisation
- Any components with a cost of 10% or less of the total cost of the asset will not be componentised separately

Componentisation is considered for new valuations, enhancement expenditure and acquisition expenditure carried out on or after 1 April 2010. Where a component is replaced or restored (i.e. enhancement expenditure) the carrying amount of the old component shall be de-recognised before reflecting the enhancement.

The Council recognises the following levels of components:

- Substructure
- Superstructure
- Internal services

- External works

Componentisation is not applicable to land as land is non-depreciable and is considered to have an infinite life.

Disposals and Non-Current Assets Held for Sale

When it becomes probable that the carrying amount of an asset will be recovered principally through a sale transaction rather than through its continuing use, it is reclassified as an Asset Held for Sale. The asset is revalued immediately before reclassification and then carried at the lower of this amount and fair value less costs to sell. Where there is a subsequent decrease to fair value less costs to sell, the loss is posted to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement. Gains in fair value are recognised only up to the amount of any previous losses recognised in the Surplus or Deficit in the Provision of Services. Depreciation is not charged on Assets Held for Sale.

If assets no longer meet the criteria to be classified as Assets Held for Sale, they are reclassified back to non-current assets and valued at the lower of their carrying amount before they were classified as held for sale; adjusted for depreciation or revaluations that would have been recognised had they not been classified as Assets Held for Sale, and their recoverable amount at the date of the decision not to sell.

When an asset is disposed of or de-commissioned, the carrying amount of the asset in the Balance Sheet (whether PPE or Assets Held for Sale) is written off to Other Operating Expenditure in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. Any receipts from the disposal are credited to the same line in the Comprehensive Income and Expenditure Statement also as part of the gain or loss on disposal (i.e. netted off against the carrying value of the asset at the time of disposal). Any revaluation gains accumulated for the asset in the Revaluation Reserve are transferred to the Capital Adjustment Account.

Amounts received for disposal in excess of £10,000 are categorised as capital receipts, receipts below this amount are classed as revenue income. The written-off value of disposals is not a charge against Council Tax, as the cost of non-current assets is fully provided for under separate arrangements for capital financing. Amounts are appropriated to the Capital Adjustment Account from the General Fund balance in the Movement in Reserves Statement.

Depreciation, impairment losses and revaluations are not permitted to have an impact on the General Fund Balance, they are therefore reversed out of the General Fund Balance in the Movement in Reserves Statement and posted to the Capital Adjustment Account.

Provisions and Contingent Assets/Liabilities

Provisions are made where an event has taken place that gives the Council an obligation that will probably require settlement by a transfer of economic benefits or service potential and a reliable estimate can be made of the amount of the obligation, but where the timing of the transfer is uncertain.

Provisions are charged as an expense to the appropriate service line in the Comprehensive Income and Expenditure Statement in the year that the Council becomes aware of the obligation, based on the best estimate at the Balance Sheet date of the likely settlement. When payments are eventually made, they are charged to the provision carried in the Balance Sheet. Estimated settlements are reviewed at the end of each financial year – where it becomes less than probable that a settlement is required (or a lower settlement than estimated is made) the provision is reversed and credited back to the relevant service.

In the event that a possible liability (or asset) arises which may require settlement by a transfer of economic benefits, but the timing and amount of the transfer is uncertain and the obligation will only be confirmed by occurrence or otherwise of a future event, then this will not be recognised in the Balance Sheet, but will be shown in a note to the accounts as a contingent asset or liability.

Reserves

The Council sets aside specific amounts as reserves for future policy purposes or to cover contingencies. Reserves are created by appropriating amounts out of the General Fund Balance. When expenditure to be financed from a reserve is incurred, it is charged to the appropriate service in the year and is therefore included in the Surplus or Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement. The reserve is then appropriated back into the General Fund Balance so that there is no net charge against council tax for the expenditure.

Certain reserves are kept to manage the accounting processes for non-current assets, financial instruments and retirement and employee benefits and do not represent usable resources for the Council.

Revenue Expenditure Funded from Capital under Statute

Expenditure incurred during the year that may be capitalised under statutory provisions but does not result in the creation of a non-current asset has been charged as expenditure to the relevant service in the Comprehensive Income and Expenditure Statement in the year. Where the Council has determined to meet the cost of this expenditure from existing capital resources or by borrowing, a transfer in the Movement of Reserves Statement from the General Fund balance to the Capital Adjustment Account then reverses out the amounts charged so there is no impact on the level of council tax.

VAT

VAT payable is included as an expense only to the extent that it is not recoverable from Her Majesty's Revenue and Customs. VAT receivable is excluded from income.
